Education

2018-2022
B.TECH. IN CSE
VIT Bhopal
CGPA : 8.3/10

2015-2017
HSC
Shree Vinayak Academy
International School
Percentage: 76%

2013-2015
SSC
Shree Vinayak Academy
International School
Percentage: 92%

Achievements

3 stars in Leetcode
JUNE 2021
React(Basic) Hackerrank
JUNE 2021
Node(Basic) Hackerrank
MAY 2021
JPMorgan Chase - Engineering Virtual Program
NOV 2020
HTML,CSS and Javascript for web developers - Coursera

Internship

AUG 2021 - PRESENT
MERN Stack Developer Intern   **Applore**

I am working as Full Stack MERN developer in the team with UI-UX developers, Graphic designers, other MERN developers and building projects for the company depending on the clients requirement.
I am learning a lot about team work and project workflow.

JAN 2021 - MARCH 2021
Technical Content Writer(DSA and programming)   **GeeksForGeeks**

I wrote articles on GeeksforGeeks on topics of Data Structures and Algorithms that were not present on their portal. Some of them are mentioned below

**Printing TreeMap having custom class objects as keys or values in Java.
How to maintain insertion order of the elements in Java HashMap?**

Projects

APRIL 2021 - MAY 2021
Mumble   **Nodejs, Express, MongoDB, Cloudinary, EJS, GSAP, Bootstrap**

- A web application that lets user share their secrets. anonymously
- It is a **CRUD** app with features such as reactions, comments, photos etc.
- Used **NodeJS** with **Express** server and used **MongoDB** as my database. Implemented google authentication as well as email authentication.

MAY 2021
GFind   **React, Context API, Javascript, HTML, CSS**

- Github finder helps you to find users in Github.
- It also gives you brief information about that user such as location, bio, followers, gists, recent repos, and much more.
- I have worked with **Github API** , **Context API** for state management and used **React** Framework for this project.

JUNE 2021
Your Sudoku (Team Project - 2)   **React, Backtracking, Sass, Framer Motion**

- A DSA based project integrated with web development.
- Gives solutions of your custom sudoku and let's user solve them with appropriate warnings.
- I implemented **backtracking** to solve this and used **React** with **Framer Motion** for animations.

DEC 2019 - JAN 2020
Kryptoblaze (Team Project - 6)   **Unity Engine, Adobe Photoshop**

- A 2d top-down shooter game with a dark story and cartoonish characters.
- I used **Unity** for game development, **Photoshop** for designing characters.
- It was my first time working in a team. I was the team lead, learned a lot about teamwork and coordination while keeping everyone motivated.
